"The Mark of Quality"

REAL ROSE HAT PINS

The process of changing real roses into metal is a discovery of the noted French electro-chemist, Prof. L. G. Delamotte, and is without doubt one of the lost arts of the ancient Egyptians. The roses used are grown in Oregon, famous all over the world for their beauty and superiority. Being made out of live roses there are no two alike, making presents which are exclusive and can't be duplicated. They are the most beautiful of all hat pins--almost as light as a feather. Finished in colors to conform to the prevailing millinery, such as Gold, Rose Gold, Green Gold, Pink Silver, Oxidized Copper, Oxidized Silver, etc.

Having the exclusive sale of "Delamotte" products for this city, we would be pleased to have you call and inspect them; any object of interest in our store may be viewed with freedom without incurring any obligation to purchase.
